CHEESE NOTES

Delice du Poitou

Loire, France

The Delice du Poitou is produced by a small co-operative dairy which was established by locals in 1897. The dairy focusses solely on goat's milk and has perfected the intense flavours and texture of the regional cheese.

A surface-ripened soft cheese with an oblong shape and salted vegetable coating, gives the exterior a dark grey colour. The flavour is citrusy and herbaceous, characteristics of a two month old goat cheese, developing to a nutty taste as it ripens with a luxurious, dense texture.
